RWCC Sample size note In Tanzania and Kenya, the population density made a larger-than-standard sample size difficult to implement within budget, so sample sizes were lower and did not encounter the same limitations in terms of reliability. Sample sizes will be adjusted in line with both the Tanzania and Kenya sampling plans for the midline and endline survey data collection																									
The Timor-Leste program is based on Community Seed Banks and is under very modest foundation funding as we seek other sources. <a href="#">LEARN MORE</a>																									
In Mali, the partnership with IRPAD encompasses important policy work and a support to a farmer led community seed banking system. <a href="#">LEARN MORE</a>																									
Ethiopia, Kenya and Tanzania are all part of the Rural Women Cultivating Change. <a href="#">LEARN MORE</a> , <a href="#">LEARN MORE</a> , <a href="#">LEARN MORE</a>																									
Honduras is a cornerstone program of the Seeds of Survival work of SeedChange around the world. In particular in the recognition of farmers seed systems and innovation. <a href="#">LEARN MORE</a> , <a href="#">LEARN MORE</a> , <a href="#">LEARN MORE</a>																									
PRODIG's approach is informed by local Indigenous knowledge systems and includes a training methodology called EFLEP1 (video) <a href="#">WATCH VIDEO</a>																									

Direct participants with daily or weekly contact with the project. Direct beneficiary figures are larger by a multiple of 4 as many members of each family benefit as an immediate result of project actions.
